

“

Movemeon has all the pros with none of the cons of traditional recruitment agencies. The quality of the candidates was very high: they independently researched my company and applied based on interest.

# Our Story

As candidates at McKinsey, we were frustrated by jobs boards and agencies.

We wanted a platform just for us: something credible, curated and without the middle man.

Something for employers to reach us directly, even if we weren't actively looking.

So movemeon was born.
